About Me

Passionate about technology, I have gained one year of hands-on experience through intensive projects and studies. I am seeking my first opportunity for an internship in FrontEnd or Full Stack development, where I can apply and further enhance my skills in building web applications while ensuring high-quality code, scalability, and adherence to best practices (SOLID, Clean Code).

Knowledge

Web Development:

- Practical experience building both FrontEnd and BackEnd applications
- Deep understanding of responsive design and dynamic interfaces

FrontEnd Technologies:

- Proficient in React, Next.js, and Vite
- Skilled in using Tailwind CSS and Shadcn UI for effective styling and design

BackEnd Development:

- Experience with Node.js and Express for creating robust, scalable APIs
- Familiar with middleware integration and error handling practices

Database Management:

- Competent in MySQL for data modeling, query optimization, and relational data management

Development Best Practices:

- Strong commitment to writing clean, maintainable code using SOLID principles and Clean Code practices
- Proficient in using Git and GitHub for version control and collaborative development

Additional Skills:

- Intermediate English (B1) for reading, writing, and communication

Professional Experience

Projeto Nova Horizonte

Front-End Developer

January 2025 – February 2025

- *Developed user interfaces using React and Vite, implementing modern components optimized for high performance.*
- *Applied responsive and consistent styling with Tailwind CSS, ensuring a seamless user experience across various devices.*
- *Created dynamic forms for quote requests, employing accurate field validation using regular expressions (Regex).*

Used Technologies:

- **FrontEnd:** React, Vite, Tailwind CSS, Phosphor Icons, Shadcn UI
- **Send Forms:** EmailJS
- **Regex:** Field Validation

Education

FrontEnd Developer Program

Tokio School – May 2024 – March 2025

Key concepts learned:

- ***Fundamentals of HTML, CSS, and JavaScript***
- ***Development with React and styling with Tailwind CSS***

Python Programming

Tokio School – November 2024 – Present

Key concepts learned:

- *Object-Oriented Programming (OOP) concepts: Classes, Functions, Objects, and Methods*
- *Application development with Flask and data management using SQLite*
- *Introduction to Artificial Intelligence (AI) and Machine Learning*
